

CHANDRAKANTH REDDY Y

Tiruchirappalli, Tamil Nadu, India

+91 7989287158 | chandrakanthreddy.dev@gmail.com | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

Motivated Computer Science student (B.Tech, 2027) seeking a Full Stack Developer role to apply hands-on experience in Django, React, PostgreSQL, and REST APIs while contributing to a collaborative and fast-paced team environment.

EDUCATION

SRM Institute of Science and Technology <i>B.Tech in Computer Science and Engineering – CGPA: 8.7/10</i>	Tiruchirappalli, Tamil Nadu <i>Jun 2023 – May 2027</i>
Sri Vidya Junior College <i>Intermediate – 84%</i>	Medchal, Telangana <i>Jun 2021 – May 2023</i>
Sri Vidya Junior College <i>10th Class – 70%</i>	Kurnool, Andhra Pradesh <i>Jun 2020 – May 2021</i>

INTERNSHIP

Infosys Springboard Virtual Internship 7.0 <i>Intern – Infosys Springboard</i>	Remote <i>2026</i>
Selected after successfully completing prerequisite courses and assessments on Infosys Springboard; batch allocated and document verification completed, awaiting commencement date.	

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL
Frontend: React.js, HTML5, CSS3, Responsive Design
Backend: Django, Flask, REST APIs
Database: PostgreSQL
Core CS: Data Structures, Algorithms, OOP, Operating Systems, Computer Networks
Tools & Practices: Git, GitHub, Linux, Scapy, iptables

PROJECTS

SecureMeet – Secure Invitation-Based Video Meeting Platform <i>Django, React.js, DRF, WebRTC</i>	2026
- Engineered a full-stack secure video conferencing platform enabling hosts to schedule meetings, manage participants, and enforce invitation-only access control through a React frontend and Django REST backend. - Designed and implemented a relational PostgreSQL database schema for users, meetings, invitations, notifications, and chat records, ensuring scalability and data integrity across the platform. - Developed secure REST APIs with JWT-based authentication, role-based authorization, and meeting access validation, preventing unauthorized users from discovering or joining private meetings. - Built a responsive React.js interface featuring meeting scheduling, invitation management, notifications, participant dashboards, and real-time meeting controls for an enhanced user experience. - Integrated WebRTC-based audio/video communication and real-time messaging architecture, enabling secure peer-to-peer conferencing while maintaining privacy through invitation-driven meeting access.	
Dual-Mind IDS – Intrusion Detection System <i>Python, Scapy, Flask, Random Forest</i>	2026
- Built a hybrid full-stack security system combining packet inspection (Scapy) with a Random Forest ML model for intelligent anomaly detection, exposed via a Flask web dashboard. - Developed real-time monitoring and alert visualisation dashboard on the Flask frontend, demonstrating ability to build functional, data-driven web interfaces. - Implemented automated IP blocking via iptables for detected SYN flood and port scan attacks, integrating backend logic with system-level operations. - Reduced false positives by combining rule-based filtering with ML-based anomaly detection, improving system reliability and user trust. - Processed live network traffic streams enabling near real-time threat detection – demonstrating experience with backend services powering real applications.	

CERTIFICATIONS

Basics of Python

Online Certification

Infosys Springboard

April 2026

Database Management System Part 1

Online Certification

Infosys Springboard

April 2026

ACHIEVEMENTS & ACTIVITIES

Guidewire DEVTrails Hackathon 2026

National-level hackathon in collaboration with EY

2026

- Built data-driven solutions under competitive conditions, collaborating in a cross-functional team environment – reflecting the collaborative, fast-paced culture valued at o2h tech.

ML Research: NSL-KDD Cybersecurity Dataset

Supervised Machine Learning – End-to-End Data Science Workflow

2026

- Applied supervised ML from raw data to a deployed model, demonstrating analytical thinking and problem-solving ability grounded in real-world datasets.
